- Code (1U9) Load step concept [1]
- Code (460) Canada version [1]
- Code (494) USA version [1]
- Code (498) Japan version [1]
- Code (Z04) High protection B4 [1]
- Code (R) Right-hand drive

[1] no manufacturer release with this equipment

---

### Product information

- Mechanically swivelling trailer hitch with ESP® trailer stabilization in Mercedes-Benz original quality.
  - If desired, the towing hitch can be concealed behind the rear bumper when not in use.
  - 13-pole socket (adapter to 7-pole optionally available)
  - A special camera resolution and an additional auxiliary line are available in conjunction with COMAND and rear view camera.
  - Extended usability through optional rear bike carrier directly on the AHV.
- 

### Operating instructions

Mechanical release of the ball neck via a control element in the boot

Ball neck must be brought into end position by hand

Power supply terminal 15 (ignition positive) at pin 10 (max. 180 W) and terminal 30 (continuous positive) at pin 9 (max. 240 W)

No trailer battery may be charged via the power supply at the trailer socket (pin 9 or 10)!

---

### Organizational information

In Germany, an installation inspection by an authorised technical inspection authority is not required. Outside Germany, the country-specific laws and regulations must be observed.

Ask the customer to familiarise himself with the chapters "Towing device" and "Trailer operation" in the operating instructions.

---

### Assembly instructions

Note text "Retrofitted tow hitch in accordance with AN31.10-P-0001EW" in VeDoc under AO texts to KG 31.

Enter code 550 into the vehicle data card via VeDoc

SCN coding: SAM front, KI, ZGW and ESP (COMAND, RFK and PTS if available)

Commissioning: Control unit AAG

Switch off ignition, lock vehicle and wait for bus to rest!

If you have any questions or feedback, please contact the [ADANA-Support](#).

---

### WIS-assembly instructions

AN31.10-P-0001EW - Retrofit mechanical swing-away trailer hitch
